B Handle Bar Risers

Raising the bars up approximately 1-1/2" makes a real difference in the weight on your hands. Raising your bars with our handlebar riser lets you raise the bars but still retain the stock angle. This is very important to maintaining even weight distribution across your hands during braking and turning. The handlebars will not hit the fairing or the tank when turned full-left or full-right. There is no need to remove or change any of the controls on the handlebars. Most installations can be completed in as little as 10 minutes. These risers will raise the bars up approximately 1-1/2" and back approximately 1-3/4". This will help to relieve wrist and neck pain on long rides. May require some re-routing of control cables, wiring, or hoses. Will not fit 1" tube handlebars. **Note:** For 7/8" bar only. Fits: T & newer. Also fits V50's & 750 Brevia.

“...Frequent oil changes are a must for PROLONGED ENGINE LIFE. The **Outsider** makes changing your oil filter a thing of pleasure...”

CHANGE OIL EASIER
with HARPER'S
RUN BETTER LONGER

Outsider for 1976-1997

Harper's Outsider for 1998 and later

Harper's Outsider External Oil Filter Kit

We have improved an old favorite. Just when you thought it couldn't get any better...

With the internal oil filter there is always that chance that the filter could come loose and cause expensive internal damage. Not with the Outsider. The Outsider allows you to move your oil filter to the outside rear where you can change it easily and enables you to monitor it at anytime. For peace of mind, we added an oil filter protector to the new style Outsider. The Wedge. It attaches to the oil pan bolts and sets under the oil filter.

Frequent oil changes are a must for prolonged engine life. The Outsider makes changing your oil filter a thing of pleasure instead of drudgery. Just spin off the old and spin on the new. No more dropping the messy oil pan just to get to the filter.

All metal construction-no internal rubber lines. Simple installation. Does not increase oil capacity significantly. The Outsider works on bikes with internal oil filter, only.

Complete kit includes: The Outsider, easy to understand instructions, a stock oil filter, two pan gaskets and all necessary hardware.

A Original Outsider-Redesigned...

- Made from billet aluminum with steel lines and stainless steel fittings.
- Fits all Tonti frame machines 1976 thru 1997.
- Some exhaust changes may required. '85 & newer LeMans and '93 & later California's require X-over change. Call for application.
- Easy bolt on application-no drilling.

B Harper's New Outsider...

- For 1998 and newer cruisers with deep sump and the Quota. Will not work on sport models.
- Made from billet aluminum with easy bolt on application— no drilling. No need to remove the cross over or flywheel guard to install the Outsider.

PERFORMANCE RELIABILITY

.....>

NIKASIL COATED CYLINDERS

Nikasil Electroplating — No Photo Better than Relining

Why have your cylinders Nikasiled? You get much better results than with the steel sleeves. Nikasil dissipates heat much more efficiently than steel. Nikasil coated cylinder walls have a hardened surface that cannot peel and is more wear resistant than the steel sleeves.

Although the Nikasil process is expensive, the resulting increase in the cylinders life span, performance and reliability more than offset the cost.

We will bore the cylinders to fit your pistons or to new pistons.

Note: This process uses the same rings and pistons as OEM cylinders. No special parts needed. Turn around time about 14 to 21 days.

NIK ELECTROPLATE YOUR CYLINDARS \$409.90 PR

A Alternator Removal Tool

If you do your own work, this is a tool you will want in your tool box. This special tool makes removing your alternator much, much easier. *It is worth the money.*

NOTE: This tool is a hardened dowel pin that we have cut to the proper length. This is not a taper pin.

Taper pins are soft as well as most other things you can put in there which will bend and then it is lodged in the hole and you can't do anything else until you get it out.

**Alternator Rotor
New, *Not* Rebuilt**

This is the correct fit rotor for all Moto Guzzi's with a Bosch charging system. The commonly used BMW rotor produces less charge to the battery because it's smaller diameter leaves a large air gap causing dim lights and inefficient operating conditions.

NOTE: All Progressive Suspension shocks are the same except for length. Example: If you have an 1100cc and want to drop the bike by 1" use 77-1201 shock body and corresponding spring.

These shocks are gas charged for superior fade free dampening and consistent operation.

Magnum springs are dual rated and they are so good they come with a manufacturers Lifetime warranty! Spring rates are matched to the proper load carrying capacity for your needs. Optional heavy duty springs for two up, racing or extra load carrying capacity are available for most applications.

Important Suspension Information

The standard spring recommended is for the bike sold as new, excluding any bolt-on accessories, rider weight under 200 lbs., and passenger use to under 50% of the time. Heavy duty spring is recommended for riders over 200 lbs., passenger usage over 50% of the time and/or add-on accessories (such as fairing, bags, etc.) that have added considerable weight. Springs sold separately. Priced per pair.

We recycle our boxes and packing material and urge you to recycle, too!

If you are wanting to lower a bike— here are some suggestions:

You want to do everything in *small stages* as you are changing the dynamics of the bike.

1. Shorter shocks, but never more than an inch shorter than stock. The swing arm should always be at a downward angle. It should never be level. The rear drive should always be lower than the U-Joint.
2. Remove some foam from the seat.
3. Lower the triple clamp on the forks.
4. Lower profile tires.

F Books make a great gift!

We have Parts, Workshop and Owners manuals for most models available. Some are reprints as they are no longer available from the factory. A Factory Parts Book is invaluable as a companion to the workshop manual. Not only does it show you all the exploded views to help with repairs but gives you the part numbers to help make ordering much more accurate. There are too many to list them all here. **Visit our Web site or call and order by year and model. Prices vary.**
